Genie 4.0 Licensing Options and Considerations

** Each Genie 4.0 model is available via the following options.*

1-Year License <i>Predictable annual pricing ideal for Operational Expense (OpEx) budgeting</i>	<ul style="list-style-type: none"> • One-year subscription to operate any version of the software (upon expiration, license can be renewed) • Software and renewal provided via electronic download • All software updates available as released • Priority Technical Support included
3-Year License <i>Locked-in pricing for subscription duration, with no need for annual repurchase</i>	<ul style="list-style-type: none"> • Three-year subscription to operate any version of the software (upon expiration, license can be renewed) • Software and renewal provided via electronic download • All software updates available as released • Priority Technical Support included
Perpetual License <i>Upfront purchase option for those unsure about a subscription</i>	<ul style="list-style-type: none"> • Non-expiring license to operate a specific version of the software via a one-time purchase • Software provided via electronic download • Not eligible for software updates • Does not include Priority Technical Support

WHY SUBSCRIPTION MAKES SENSE

Lower upfront cost and predictable ongoing pricing

Whether you choose a one-year or three-year license, you can count on consistent annual pricing for predictable budgeting through your operational (OpEx) budget. Plus, with a subscription, you get the software as well as world-class support – resulting in a further reduction in total cost of ownership.

Confidence your software will stay current, cyber-secure and up-to-date with regulatory requirements

Genie 4.0 subscription models include all software updates, new value-added features and bug patches released during your subscription period.

Expert technical support

Subscription offerings come complete with Priority Technical Support, getting you rapid support when you need it most. Additionally, Mirion Services are available to assist in installation and configuration, as well as validation and verification of changes to your system.

The ability to scale up fast

Whether you're interested in a trial period or a one-time campaign (e.g., teaching a course at a university), Genie 4.0 time-based licensing can give you a head start.

You're ready to move beyond the dongle.

Genie 4.0 software marks our transition away from CDs and USBs – toward a more efficient and eco-friendly approach to managing software licensing and distribution for all.

A CLOSER LOOK AT LICENSING

Q: How will the software be provided?

A: Beginning with Genie 4.0 software, all software for installation, updates and renewal will be provided via electronic download (physical media available by request). This applies to all models and licensing options: 1-Year License, 3-Year License, and Perpetual License.

Q: As updates become available, will subscription-based users be required to install them?

A: No, you can install the update whenever you are ready. However, please note that while your subscription license will be valid for any version, Mirion Technologies typically provides support for the current version of software and its most recent prior version.

Q: If I purchase a Perpetual License, how can I obtain an update when a new software release is available?

A: If a user does not have a subscription license and would like to receive a new release of Genie, the purchase of a new license will be required. Consult your account manager and ask about our loyalty programs.

Q: What about critical patches?

A: Yes, critical patches will be made available to all users, regardless of license type.

Q: What does Priority Technical Support entail?

A: All technical support calls or emails are assigned a service level when received. Priority level tickets are moved to the front of the queue. We commit to a response time within one standard business day, and often provide a resolution more quickly.

Q: Do you recommend that users buy Support services from Mirion to assist with the transition to this new model?

A: Priority Technical Support is included with Genie 4.0 subscription models, which we trust you will find helpful. However, you may want to consider additional start-up assistance and training.

Q: If I choose not to renew my subscription, what are my options?

A: Your software will no longer operate at the end of your licensed period, following a grace period. If you choose to renew at a later time or purchase a Perpetual License, your software can quickly be reactivated with no data lost.
