

**PORTABLE RADIATION
MEASUREMENT**

AB-100™

Detection Module

NEW

A Technology Revolution for a User Evolution

Powered by Mirion’s revolutionary new LightLink technology, the CSPevo family significantly evolves portable radiation measurement – offering robustness, versatility and enhanced light collection.

**ERGONOMIC,
LIGHTWEIGHT**

For ease of use

For One-Hand Operations

Enhanced Versatility, Handle Flexibility

The AB-100 module is ideal for detecting Alpha and Beta emitters simultaneously. This module is the first of the CSPevo product line, enabling reliable frisking and smear counting. Its lightweight, ergonomic design reduces user fatigue and enhances ease of use, making it ideal for radiation protection teams and system integrators.

For Hard-to-Reach Areas

Reduce Fatigue and Increase Accuracy

The AB-100 module is compatible with different handles and can be connected to various host instruments for different applications including self-frisking and on-site surveys.
